### DETAILED ACTION

This Office action is in response to the amendment filed August 2, 2004 in which claims 2 and 9 were canceled.

1. The non-statutory Double Patenting rejection is withdrawn in view of Applicant filing a terminal disclaimer.
2. The 102 rejections over Ford, Matthews and Schaffer are withdrawn in view of the amendment to the claims.

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over FR 2683544.

FR teaches a fuel product comprising coal fines and a polymeric binder, ethylene/vinyl acetate copolymers. The binder is in the form of an emulsion. In the case of the aqueous formulation, additional water is present in the mix. The coal, binder and water are mixed in a kneader. See abstract; page 4, ninth paragraph; page 5, third and fourth paragraphs; page 6, first full paragraph and paragraphs 3 and 5; and Examples.

FR differs from the claims in that it does not specifically teach that the coal is run of the mine coal. However, no unobviousness is seen in this difference because the

general teaching of substances rich in carbon and the exemplified coal products suggest run of mine coal.

Applicant argues that the claims distinguish over the art because the coal is now limited to run of mine coal. However, as stated above, no unobviousness is seen in this difference because the general teaching of substances rich in carbon and the exemplified coal products suggest run of mine coal.

5. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art fails to teach or suggest the use of alcoholic diluents.

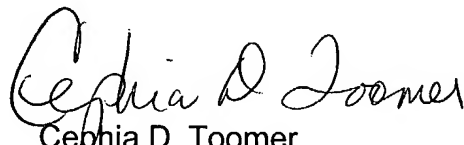

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
